Overview

At 4:30PM we provide Integration Support and we develop mobile patient monitoring solutions for clinicians on the move. We support healthcare providers here in Bulgaria, and healthcare providers in other countries; including the UK, where we support the NHS.

We provide an extremely high level of IT technical expertise, coupled with excellent communication skills.

Mobile Applications

4:30PM currently has two mobile health applications that are being offered to healthcare providers, Results Tracker ™ and a Mobile Patient Wristband Reader.

Results Tracker ™ is a mobile application designed to provide pathology results for clinicians that need up to the minute information on the wellbeing of their patients.

Mobile Patient Wristband Reader is an application that has been developed which makes use of Casio's barcode reader technology, to provide a range of services from Radiology and Theatre events to Phlebotomy.

Integration Support

At 4:30PM we pride ourselves on being able to deliver excellent IT integration support to the healthcare sector. We offer our clients a service that few will be able to compete with, either on price or quality of service.

If you'd like to talk to us about how we can help you, then please get in touch with us.
